

# Can liquid crystal phases be identified via machine learning?

Joshua Heaton

School of Physics and Astronomy, The University of  
Manchester

December 7, 2020

## **Abstract**

hi

# 1 Introduction

# 2 Liquid crystal phases

## 2.1 Physical structures

## 2.2 Capturing textures

# 3 General machine learning principles

## 3.1 Tasks, performance measures and experience

## 3.2 Supervised and unsupervised learning

## 3.3 Optimisation

## 3.4 Underfitting and overfitting

## 3.5 Model capacity and regularisation

## 3.6 Hyperparameters

# 4 Neural networks

## 4.1 Hidden units and network architecture

## 4.2 Neural network training

## 4.3 Regularisation methods

# 5 Convolutional neural networks

## 5.1 Convolutional layers

## 5.2 Pooling layers

# 6 4-phase classifier models

## 6.1 Dataset preparation

## 6.2 Model architectures and training configuration

## 6.3 Results

# 7 Smectic phase classifier models

## 7.1 Dataset preparation
